**Notes**

1. No attempt will be made to produce an accurate weather start. The course chosen will be the best course to weather for the existing wind conditions.
2. The boat with the highest PHRF rating starts no earlier than the starting sound at the end of the normal 5 minute cycle.
3. The starting time for each remaining boat is determined by the delay specified by the minutes and seconds specified at the xy intersection of your boat name and course selection.
4. Handicap time is applied at the beginning of the race instead of at the end. Hence, if all boats cross the finish line at the same time they all be tied for first. Boats with low handicaps must catch up with those boats starting earlier in order to improve their finish position.
5. As an example, If the course chosen is 25, then Paradox would start 2 ' 30" after Freya.
6. Any boat declared NFS will be DSQ'd if a spinnaker is hoisted
